## Business Report

(From April 1, 2012 to March 31, 2013)

### 1. Current State of Corporate Group

#### (1) Operations and results

In the fiscal year, there was a gradual recovery in the Japanese economy. One reason was demand associated with Great East Japan Earthquake recovery activities. The recovery was also backed by a weakening yen and stock market rally sparked by financial initiatives enacted following the formation of a new government. However, the outlook of the Japanese economy remained uncertain mainly because of financial instability in Europe and thus a sluggish global economy.

Passenger vehicle orders placed with Nissan Shatai by Nissan Motor Co., Ltd. increased for the Patrol (Y62) for export. But there was a decline in orders for the Elgrand and NV200 Vanette due in part to the end of Japan's eco-car subsidy. As a result, sales volume decreased by 4.6% year-on-year to 90,374 units and net sales decreased by 2.3% to 259.7 billion yen.

For light commercial vehicles, there was a decline in production of the Pickup for export due to the termination of production in February 2012. But there was an increase in output of the new NV350 Caravan that was launched in June 2012. Overall, sales volume decreased by 3.9% to 85,127 units but net sales increased by 9.7% to 130.6 billion yen.

In the microbus category, although there was an increase in output of the new NV350 Caravan, sales volume decreased by 1.5% to 11,931 units but net sales increased by 1.7% to 24.0 billion yen.

Overall, compared with the previous fiscal year, vehicle sales volume decreased by 4.1% to 187,432 units. Including vehicle parts and other products, consolidated net sales increased by 2.2% to 464.8 billion yen.

Operating income decreased by 13.0% to 9.9 billion yen mainly because of the decline in sales volume and increase in new vehicle-related expenses and ordinary income decreased by 13.4% to 9.4 billion yen. Net income was down by 45.5% to 3.4 billion yen. Factors affecting net income included a 4.2 billion yen decrease in gains on sales of investment securities, a 0.9 billion yen increase in gains on sales of fixed assets and a 1.3 billion yen decrease in loss on disaster resulting from the Great East Japan Earthquake.

#### Sales Breakdown

Category	Volume (Units)	Amount (Million yen)	Year-on-year change (%)
Passenger vehicles	90,374	259,714	(2.3)
Commercial vehicles	85,127	130,675	9.7
Microbuses	11,931	24,082	1.7
Vehicle parts, etc.	—	50,398	9.5
Total	187,432	464,871	2.2

## (2) Funding activities

There were no funding activities to be reported during the fiscal year under review.

## (3) Capital expenditures

Capital expenditures during the fiscal year under review totaled approximately 17.4 billion yen. This was for the expansion of product range through the creation of new products and minor changes of existing products, as well as for the enhancement of plant and equipment by such means as the rationalization of manufacturing facilities, the improvement of welfare facilities, and environmental improvements.

## (4) Issues and outlook for the year ahead

To respond to the yen's rapid appreciation, growth of emerging country markets and other changes in the operating environment, Nissan Shatai started the current medium-term management plan in fiscal 2011. The plan has four medium-term pillars: "Make our plant global benchmarks for overall capabilities in quality, cost, and time (QCT)," "Create flexible manufacturing facility for high-mix, low-volume production," "Strengthen light commercial vehicles (LCV) operations outside Japan," and "Actively expand production and sales."

In fiscal 2012, production of the new NV350 Caravan model started at Nissan Shatai Kyushu, which began operations in 2010, and we established a production framework for full-capacity output. In addition, the Shonan Plant completed the consolidation of manufacturing activities from Zone 4 to Zone 2, which was the final stage of this plant's reorganization plan. Completing this plan gives us a foundation that is capable of maximizing the benefits of multi-product mixed production line.

At all of our operations from product development to production preparations, we strengthened our ability to conduct overseas operations with a focus on LCV, the category where we are most competitive, expanded activities to support overseas production projects. Moreover, we stepped up market surveys outside Japan to make our lineup of vehicles, including special equipment vehicles, even more appealing in the fields..

We will continue working on taking full advantage of our fully integrated manufacturing operations, extending from product development to production, and the respective strengths of Nissan Shatai Kyushu and the Shonan Plant. Through these activities, we will further boost the confidence of customers, shareholders, business partners, local communities, employees, and other stakeholders by continuing to increase corporate value.

(3) Policies on deciding dismissal and denial of reappointment of accounting auditor

If judged to be necessary, for example in the event of there being obstacles to the performance of the duties of an accounting auditor, the Board of Directors shall, with the agreement of the Board of Statutory Auditors or at the request of the Board of Statutory Auditors, propose the dismissal or denial of reappointment of the accounting auditor to a general shareholders meeting.

In the event that the Board of Statutory Auditors deems that any of the items in Article 340, Paragraph 1 of the Companies Act apply to the accounting auditor, the Board of Statutory Auditors shall, with the unanimous agreement of all the statutory auditors, dismiss the accounting auditor. In that event, a statutory auditor appointed by the Board of Statutory Auditors shall report the dismissal and the reasons therefor to the first general shareholders meeting convened after the dismissal.

## **5. Outline of Content of Resolution for the Creation of Systems to Ensure Proper Conduct of Business**

(1) Systems to ensure that directors and employees comply with laws, ordinances, and the Articles of Incorporation in the execution of their duties

Recognizing the importance of directors and employees acting with sound judgment as members of society, Nissan Shatai developed the “Nissan Shatai Code of Conduct—Our Promise” in the aim of ensuring legal compliance and proper execution of duties. In-house training and other courses promote greater understanding of this code, and all directors and employees are asked to sign it. The Internal Audit Office also conducts audits of divisions within Nissan Shatai primarily to check compliance with laws, ordinances, and the Articles of Incorporation.

The Easy Voice System, internal reporting system, has been introduced so that employees can easily and directly provide information on compliance issues, and such issues are promptly identified and rectified. If a matter that could contravene the code of conduct is reported, a meeting of the Compliance Committee is immediately convened to promptly discuss and implement a solution. The Compliance Committee provides monthly reports to the Executive Committee on its activities.

Nissan Shatai is resolute in its opposition to antisocial forces. In the event that directors or employees are approached in any way by members of antisocial groups, they quickly report the matter to their superiors and relevant divisions and follow instructions. If directors or employees directly or indirectly encounter dishonest or criminal conduct such as fraud or extortion in the course of their duties, or if they suspect such conduct, they resolutely refrain from involvement, quickly report the matter to their superiors and relevant divisions, and follow instructions.

Furthermore, Nissan Shatai strives to enhance internal control mechanisms to ensure the reliability of financial reporting in accordance with the Standards and Practice Standards for Management Assessment and Audit concerning Internal Control over Financial Reporting published by the Business Accounting Council.

(2) Systems for storage and management of information relating to the exercise of directors’ duties

Minutes of general shareholders meetings and of Board of Directors meetings, together with records of decisions made pursuant to the authority criteria and documentation on other decisions, are stored and managed in accordance with internal regulations. Directors and statutory auditors have access to such documentation.

(3) Risk management regulations and systems

Nissan Shatai has established a Risk Management Committee chaired by the president to identify risks that could hinder business continuity or threaten stakeholder safety or security and to manage such risks (including crisis management) at a company-wide level.

Key risks for Nissan Shatai include environmental, quality, and safety issues, and to manage and minimize such risks Nissan Shatai regularly convenes meetings of specialist committees including the Environmental Committee, the Quality Committee, and the Safety Council. We develop rules, standards, and manuals and conduct rigorous training programs while also striving to minimize damage in the event that incidents do occur and to prevent their recurrence.

(4) Systems to ensure efficient execution of duties by directors

A corporate officer system has been introduced in the aim of accelerating decision-making in a streamlined Board of Directors and promoting greater efficiency in the execution of duties by delegating authority to corporate officers who take responsibility for business execution.

Separately from the Board of Directors, the Executive Committee consisting of corporate officers and other key managers meets once a week as a rule to discuss specific management issues associated with business execution. By determining rules for allocating duties and clear, transparent authority criteria, Nissan Shatai aims to make business execution more efficient.

(5) Systems to ensure proper conduct of work in the corporate group consisting of Nissan Shatai and its parent company and subsidiaries

To ensure the proper conduct of work in group companies, a code of conduct has been determined for the corporate group, including the parent company, to set out consistent philosophies on matters such as compliance and information security. The Easy Voice System, internal reporting system, function as communication tools linking Nissan Shatai with its parent company and subsidiaries when problems occur.

To achieve consistency and efficiency in group management, regular meetings are held with the parent company and subsidiaries to share information. Our statutory auditors and Internal Audit Office conduct audits of subsidiaries, and as necessary our directors and employees are appointed concurrently as directors or auditors in subsidiaries to supervise execution of duties and accounting practices on an ongoing basis.

(6) Matters relating to employees appointed to assist statutory auditors in their duties and the independence of such employees from directors

An Auditors' Office has been established and staffed with managers and other employees to assist the statutory auditors in their duties. Appointment, dismissal, and appraisal of these employees require prior consent from the Board of Statutory Auditors.

(7) Systems for reporting to statutory auditors, including reports from directors and employees

When directors or employees find any issues that may have a material impact on the management of Nissan Shatai or its group companies, they promptly report such issues to the statutory auditors.

To enable statutory auditors to identify important decisions made by Nissan Shatai and its group companies and to ascertain the execution status of such decisions, statutory auditors attend meetings of the Board of Directors and a statutory auditors' representative attends Executive Committee meetings. Progress with implementation and issues under consideration are also reported to statutory auditors during regular on-site audits of divisions. Moreover, the Internal Audit Office provides audit reports to the Board of Statutory Auditors as required.

(8) Other systems to ensure effective audits by statutory auditors

Opportunities are provided for statutory auditors to exchange views with the president on a regular basis, and statutory auditors receive periodic audit reports from the accounting auditor.
