

Nissan Shatai Co., Ltd. Q&A Summary For Investors (FY2025 First Quarter)

.....

Q. General overview of the financial results for the first quarter and the full-year forecast

A. In the first quarter, the number of units produced was 35,000, an increase of 6,000 units compared to 29,000 units in the same period of the previous fiscal year, mainly due to increased production of the all-new Patrol and all-new Armada, which were launched in the previous fiscal year. Going forward, we expect results to settle in line with the current forecast, as preparations for the launch of next-generation models will require increased costs. At this point in time, we have no plans for upward revision of the forecast.

Q. Future planning of the Shonan Plant

A. While it plans to stop production of AD in October 2025 and the NV200 Vanette in March 2027, the future planning of the Shonan Plant after that is currently under consideration.
