

Nissan Shatai Co., Ltd. Q&A Summary for Investors (FY2025 Second Quarter (Interim period))

.....

**Q. Overview of financial results for the first half of the fiscal year and forecast for the second half**

A. In the first half of the year, production volume increased due to improved production efficiency of the all-new Patrol and all-new Armada, the production of which commenced in the first half of the previous fiscal year, leading in turn to an increase in net sales. In the second half of the year, income is not expected to grow as much as it did in the first half due to ongoing new vehicle investments. At this time, there are no changes to the consolidated financial results forecast.

**Q. Background leading to the Shonan Plant being utilized as a facility dedicated to the production of service parts**

A. This decision was made because it allows us to leverage the technical skills and expertise of our employees as well as our existing equipment, while also offering potential for business expansion and continuity through the production of service parts (maintenance parts) for Nissan Motor Co., Ltd. and other companies. We already produce service parts for our own vehicles, so we can utilize our existing equipment and technology as they are now. We are also reviewing whether additional investment is necessary.
